

Bracelet Size Guide

It is easier than ever to receive a Gabriel & Co. bracelet that hugs your wrist perfectly. Use our custom size tape to determine your size. Print this page on a standard US letter size paper (8.5"x11") and scaled to 100%. Before using the tape, compare measurements to a ruler to make sure the printed tape is accurately sized.

How to measure using the custom Gabriel & Co. tape

- Cut out our custom tape and make a slit on the dotted line.
- Wrap it around the circumference of your wrist, making sure the numbers are on the outside.
- Slip the numbered end through the horizontal slit and pull until the ruler comfortably hugs your wrist.
**Please note – The paper should be pulled tight around your wrist just behind your wrist bone. There should be no extra space between the paper and your wrist. This is especially important when ordering a bracelet that is open ended and on a flexible spring wire such as our Bujukan, Demure and Contemporary collections.
- The number that lines up with the edge of the opening is the size of your bracelet.
- You can also use any piece of ribbon or cord by wrapping it around the circumference of your wrist. Measure the length of the ribbon or cord against our custom tape starting at the dotted line.

SIZE	INCHES	MM
5.5	5.50	137.7
5.75	5.75	152.4
6	6.00	165.1
6.25	6.25	177.8
6.5	6.50	190.5
6.75	6.75	203.2
7	7.00	146.05
7.25	7.25	158.75
7.5	7.50	171.45
7.75	7.75	184.15
8	8.00	196.85

*Please note that our custom tape is only to measure around the wrist. Choosing a close or loose fit is a personal choice.
